V-REX

PRODUCTION

Designed in 2007, the Travertson V-Rex is the King of V-Twins.

"If Angelina Jolie strolled down Main Street naked, perhaps with her hair on fire, she might come close to attracting the amount of attention the Travertson V-Rex does." Kevin Duke, motorcycle.com

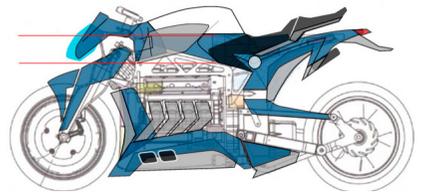

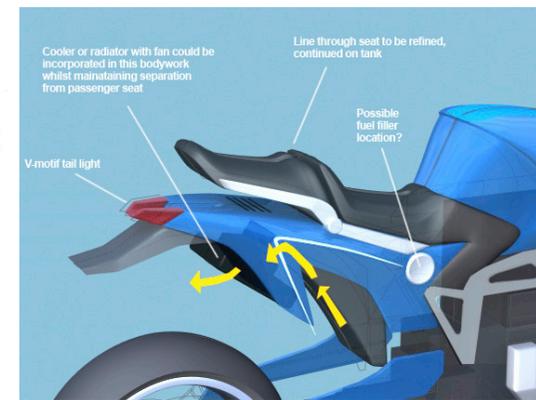

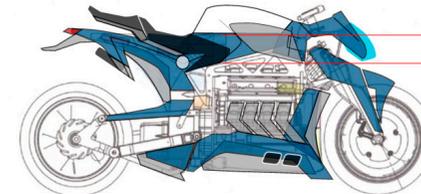

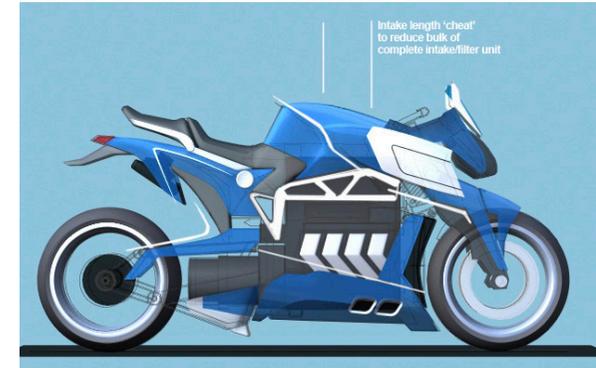

V-REX DESIGN

V-Rex was designed completely in 3D before being developed for production. These are final renders.

DESIGN

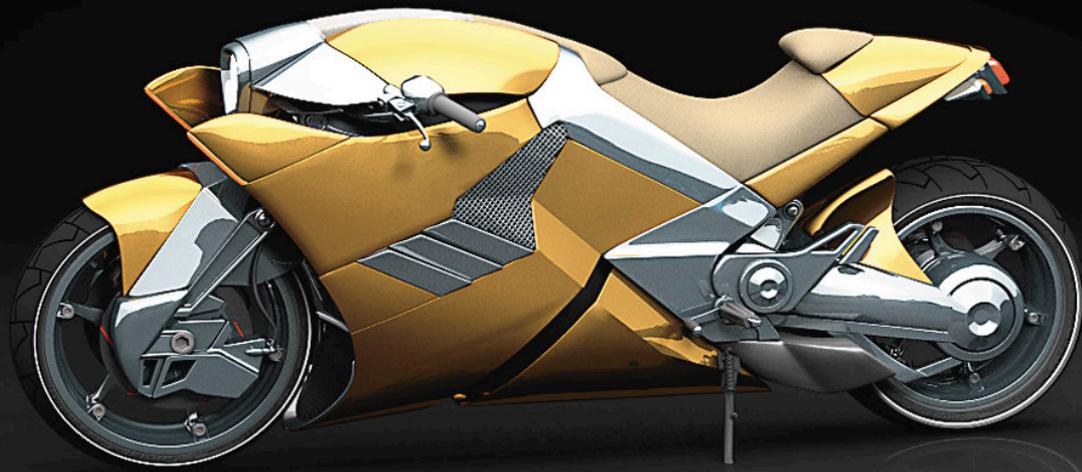

AURORA HELLFIRE

PROTOTYPE

The original hyperbike, with 400 hp available. Tim Cameron Design was responsible for combining already set parameters and requirements into a striking styling package.
